PROFESSIONAL SUMMARY

Full-Stack Software Developer with nearly 4 years of experience building and maintaining enterprise web applications. Currently a Junior System Developer and Technical Support at Inland Corporation, converting legacy desktop applications into web apps and supporting SAP Business One and AWS cloud migration projects. Strong expertise in ASP.NET Web Forms, VB.Net, MySQL, and hands-on experience with ASP.Net MVC, Entity Framework and ASP.NET Identity. Experienced in CMS development using WordPress, API integrations such as Google Maps and EmailJS, and responsive frontend implementation with React JS. Proven ability to optimize performance, maintain data integrity, and deliver scalable business solutions. Experienced in troubleshooting live systems and resolving user issues efficiently.

TECHNICAL SKILLS

Frontend: React, AJAX, JavaScript, HTML5, CSS3, Bootstrap
Backend: ASP.NET Web Forms, ASP.NET MVC (CRUD, hands-on), C#, VB.NET
Database: SQL Server, MySQL, Oracle, Stored Procedures
ERP: SAP Business One (basic administration, in-house application integration)
CMS / API: WordPress (themes/plugins), Google Maps API, EmailJS
ORM / Authentication: Entity Framework, ASP.NET Identity
Reporting: SSRS, Chart.JS
Cloud & Deployment: AWS EC2, Azure Web Apps, Vercel, SSL Certificate Setup
Tools: Visual Studio, VS Code, GitHub, MySQL Workbench, AI-Assisted Development Tools

---

PROFESSIONAL EXPERIENCE

Junior System Developer & Technical Support

Inland Corporation
May 2026 – Present *(Regular since October 2026)*

- Converted 5 legacy desktop applications, previously accessed only through Remote Desktop, into web apps; all 5 are in user testing ahead of rollout
- Took part in the company's SAP Business One version upgrade
- Helped migrate on-premise servers to the AWS cloud
- Built an AI-assisted ticketing system to track the AWS migration, including deployment and SSL certificate setup
- Perform basic SAP Business One administration and support the integration of in-house applications with SAP
- Provide technical support and troubleshooting for users across the company

Full-Stack Developer *(IT Assistant for Software Developer)*

Unitra Maritime Manila Inc.
June 2022 – December 2025

- Developed and maintained enterprise ASP.NET web applications
- Designed and implemented responsive UI using AJAX, JavaScript, and Bootstrap
- Optimized backend logic and SQL stored procedures, improving system performance
- Developed and customized SSRS reports for operational and management use
- Refactored legacy code to enhance maintainability and system stability
- Implemented data validation and logging mechanisms for reliability
- Collaborated with third-party developers on system upgrades and integrations

- Assisted in deployment and cloud hosting via Azure Web Apps
- Provided technical support and troubleshooting, resolving system issues and improving user experience

IT Support Intern

Makati Health Department
Feb 2020 – March 2020

- Developed an automated Windows-based reporting system
- Maintained and updated Microsoft Access database
- Provided technical support and troubleshooting for staff

KEY PROJECTS

Legacy Application Modernization (Inland Corporation)

- Converted 5 legacy desktop applications into browser-based web apps
- Replaced Remote Desktop access with easier-to-maintain web versions, currently in user testing

AWS Migration Ticketing System (Inland Corporation)

- Built an internal ticketing system to log, assign, and track AWS migration issues and requests
- Developed with AI-assisted tooling and deployed with an SSL certificate for secure HTTPS access

ASP.NET MVC CRUD Application (Personal Project)

- Developed a web application using ASP.NET MVC architecture
- Implemented CRUD operations using Entity Framework
- Integrated ASP.NET Identity for authentication and authorization

Enterprise Reporting System (ASP.NET + MySQL + SSRS)

- Built automated reporting module integrated with SQL Server
- Improved report generation efficiency and reduced manual processing

System Performance Optimization Project

- Refactored stored procedures and optimized SQL queries
- Significantly improved application response time

WordPress CMS Projects

- Developed and maintained WordPress websites
- Customized themes and plugins to meet client requirements
- Integrated **Google Maps API** for interactive location features

Portfolio Website (React JS + EmailJS)

- Built a responsive portfolio website using React JS
- Implemented functional contact form using **EmailJS**
- Showcased projects with interactive UI and modern design

EVENTS & TRAINING

- SAP Connect Day, BGC – attended twice
- AWS Kiro AI Live Demo

EDUCATION

AMA Computer Learning Center (ACLC)
2018 – 2020
